

RIPPEY THE RIPPER

Expresses Sorrow at not Killing Mackay.

An Anti-racing Crusade Inaugurated in New Jersey.

A Convict War Again Looked for in Tennessee.

The Chicago University—Heavy Losses by Fire in St. Paul—Mexican International Railway Extension—The Congo State.

By Telegram to the Times.

San Francisco, Feb. 26.—[By the Associated Press.] Wesley C. Rippey, who shot John W. Mackay, is now confined at intervals. He was shot tonight for the first time that his bullet had failed to reach its mark, and he said he was very sorry.

Rippey is unable to talk much, and nothing has been obtained from him as to his motive for the crime. The physicians express no hope of his recovery. Mr. Mackay is kept in close confinement in his room, and access is denied to all but his most intimate friends. He is reported as doing well, though he was quite restless today.

CRUSADE IN NEW JERSEY.

The Legislature Condemned for Legalizing Horse Racing.

JERSEY CITY (N. J.), Feb. 26.—The regular session of the Congressional Tabernacle was opened this evening and an anti-race track indignation meeting was held instead.

INDIGNATION MEETING.

FRIDGEMAN (N. J.), Feb. 26.—A large indignation meeting was held here tonight. Strong speeches were made against race track bills by clergymen, lawyers and prominent citizens.

LEGISLATURE CONVENED.

CAMDEN (N. J.), Feb. 26.—Nearly all the clergymen throughout the State today condemned in strong terms the Legislature for legalizing racing in the State. The matter will be fought through the courts.

THE CHICAGO UNIVERSITY.

President Harrison Will Be Rendered a Position by the Faculty.

New York, Feb. 26.—[By the Associated Press.] A morning paper says: "Considerable correspondence has been going on between the faculty of the Chicago University and John D. Rockefeller concerning the best methods of promoting the growth of the university. From a hint dropped by the millionaire it is believed a chair of constitutional law will be endowed in connection with the Chicago University, the salary to be \$10,000 a year."

HEAVY LOSSES.

A Fire Destroys Property Valued at \$200,000.

St. Paul (Minn.), Feb. 26.—[By the Associated Press.] A fire, caused by spontaneous combustion, on the second floor of a building occupied by the Minnesota Shoe Company, broke out at 10:20 this morning, and before the flames were brought under control the building was gutted and the adjoining establishments badly damaged.

THE MEXICAN INTERNATIONAL.

It Is to Be Extended to the Pacific Coast.

DENANGO (Mexico), Feb. 26.—[By the Associated Press.] It is now definitely settled that the Mexican International Railway is to be immediately extended from this city to the Pacific Coast.

The survey made across the Sierra Madre Mountains is the most picturesque and important railway route in the republic. It is also the intention of C. P. Huntington, president of the Mexican International, to build a line from Durango to Guadalajara, and ultimately to the City of Mexico. The Mexican International Railway Company expects to have its extension to the Pacific Coast completed to Colima within two years.

THE CONGO STATE.

Five Hundred Slaves Rescued and Released.

BRUSSELS, Feb. 26.—[By Cable and Associated Press.] The Office of Foreign Affairs for the Congo State has received a dispatch to the effect that Commander D. Hanis defeated a horde of Arab slave traders under Tipu Tib's sons, and captured 500 prisoners and 300 rifles.

During the skirmishes M. Lippens and Lieut. de Bray were killed. Lieut. Chastine routed the rebels at Yadumba and freed eighty slaves who were dying of starvation.

ANOTHER CONVICT WAR.

Tennessee Is Again Threatened With One Worse Than Before.

NASHVILLE (Tenn.), Feb. 26.—[By the Associated Press.] A convict war is again threatening to rend Tennessee. Gov. Turney has announced his intention of withdrawing the army. The miners last night held a meeting and decided to liberate 500 convicts in the valley and fire the stockades.

COMPLAINT OF A FRENCH ABBE.

The Matter to Be Investigated by the State Department.

WASHINGTON, Feb. 26.—[By the Associated Press.] There is no danger of an international complication between this country and France, arising out of the complaint of Abbe de la Croix de Castries, referred to in a dispatch from Seattle, Wash.

The matter was laid before the State Department by Patenotre, the French Minister. It was presented verbally, and he was told an investigation into the action of the customs officers complained of would be made. This investigation is now in progress, and the result will be communicated to Patenotre.

MITCHELL, THE PUGILIST.

He Honors the Hub With a Visit, but Will Not Talk.

BOSTON, Feb. 26.—[By the Associated Press.] Charles Mitchell and his backer, Abingdon Baird, arrived in this city this morning.

They were met by David H. Blanchard, and a private consultation was held, at the close of which Abingdon Baird said the money was all up for the Mitchell-Corbett fight, but would give no particulars regarding it.

Mitchell will leave here on Monday night, and after the Hall-Pittsman fight he will go to England to do some preliminary work, and return to this country about eight weeks before the date of his fight.

A PRIZE-FIGHT.

That May End in Fatal Results—The Principals Arrested.

CHICAGO, Feb. 26.—A prize-fight between John McArthur and Louis Vera, both Chicago men, was fought near this city early this morning. Both men were fearfully punished, Vera being knocked out in the twenty-second round. He was so badly injured that his recovery is doubtful. McArthur and nine others were arrested.

A SWINDLER ARRESTED.

SAN DIEGO, Feb. 26.—Frank D. Bill was arrested at Coronado this evening under telegraphic orders from the Sheriff of San Bernardino county, where he is wanted on a charge of swindling and confidence operations. He is said to have secured over \$500.

AN EDITOR DEAD.

BALTIMORE (Md.), Feb. 26.—Col. Frederick Raine, owner and editor of the German Correspondent of this city, died this evening. For more than a generation Col. Raine has been the central figure among the Germans of Baltimore.

A DEPOT ROBBER.

SAN BERNARDINO (Cal.), Feb. 26.—The Southern California Motor Railway depot, on Third street, was broken into by burglars last night and robbed of a small amount of cash and tickets. There is no clew to the robbers.

DEATH OF A PROMINENT MAN.

New York, Feb. 26.—Francis Ormond French, president of the Manhattan Trust Company, died this afternoon at Tuxedo.

SOUNDS A QUIET SUNDAY.

LAKEWOOD, Feb. 26.—Cleveland passed a quiet Sunday with Carlisle as his only guest.

A CROWNED HEAD DEAD.

STONEY (N.S.W.), Feb. 26.—King George Tubou of Tonga Islands is dead.

WHAT TO WEAR.

Dress at the Inauguration in Washington.

Will Mrs. Cleveland Smile on the New Style Gowns and Coiffures?—New Medals Expect a Rush of Two-day Orders.

Special Correspondence of The Times.

New York, Feb. 19.—The 4th of March renews Mrs. Cleveland's dream of official social life. Never in our history perhaps has a Presidential inauguration been fraught with greater import to the beauty and the comfort of American women. Many generations have elapsed since Dame Fashion threatened so sudden, so radical a change in dress, and, doubtless, the prevailing mode of the coming inaugural festivities will determine subsequent fashions.

Former inaugurations reflected the existing fashions, but circumstances force the present to officially accept or reject a barbarous revival of obsolete capes. That it rests largely with the first lady and the women of the Cabinet whether the graceful, picturesque, comfortable gowns of the present shall continue, or life be burdened with the monstrosities of 1830, appears to be the general conclusion. Mrs. Cleveland and women whose husbands have had the slightest possibilities of Cabinet honors have been besieged by pro and anti advocates of crinolines.

NATURAL GOWNS ON TWO DAYS' NOTICE.

Latest spring importations arrive closely upon the inaugural date. The uncertainty of the changes has greatly retarded the business of modistes and dry goods merchants. Naturally the extremists defer ordering their gowns until the eleventh hour. Modistes are preparing for two-day orders—that is, to make and ship to Washington on two days' notice, the latest creation of 1830 approval.

1830 CODED'S LADY BOOK RULES THE BALL.

Despite the efforts of London's Anti-Crinoline League and the repeated assertions of Worth that he will not use this spring a yard of steel or crinoline, there is every indication that the inaugural ball will be a fac-simile of the Goddard's Lady Book of 1830.

BELLES TO GO IN THEIR GRANDMOTHERS' GOWNS.

To dispel the gloom that permeated the outgoing administration, and the shadow that fell on the threshold of the incoming in the death of that beloved social leader, Mrs. W. C. Whitney, unusual efforts are being made to dispel the gloom and usher in a splendid inauguration.

Many New York belles will wear to the ball their grandmothers' gowns. A pretty debutante of the Four Hundred recently appeared at an "Assembly" in the veritable robes of her grandmother, and reached the ankles and had a flow of nine yards. It was so favorably received that the rosette took it to her dressmaker, who is now duplicating it in various colors and fabrics. The successful introduction of crinoline in New York ballrooms is sufficient guarantee for leading houses and they are rapidly filling orders for crinoline inauguration gowns.

GOONS FOR THE NEW WOMEN.

I saw yesterday at a house which has a large Washington trade, and has recently made a trousseau for one of Mrs. Cleveland's closest friends, two gowns suddenly lifted to social prominence by their husbands' political success.

One is a pompadour skirt of large, colorful satin trimmed with five graduated shades of Bruges lace, festooned with Marie Louise blue feather fleur-de-lis, each fleur-de-lis fastened by a pearl bow knot. The circum-

ference of the skirt was nine yards. Although no hoops were worn, it flows to a fullness of five yards. The inner bodice was of white satin embroidered in pearls. The outer was made of satin with Bruges lace and a border of graduated plumes to match the fleur-de-lis on the skirt, outlined the décolleté neck. Five deep ruffles of Bruges lace falling one over the other formed the sleeves.

The graceful, flowing, and the pronounced skirt must be up in the old-time courtesy. Therefore, the wearer of this gown is under instructions. It is good form to lift the skirt in front with two hands—a pretty affectation that permits the feet, like tiny mice, to creep in and out the ruffles of the dainty petticoat. Heroic are the efforts many women are now making to adapt themselves to a society with whose edicts they are totally ignorant. Pride in their husbands' positions spur them in their endeavor to keep abreast of the latest style and to the requirements of a fashionable official life. Conscious of their shortcomings, they have shrewdly put themselves in the hands of a first-class modiste. Obedient to their instructions, they will doubtless all be not in the inaugural ball, but at ease at the inaugural ball.

The veteran, no less than the debutante, will find herself for a time uncertain in the adjustment of the new habiliments. More than Desarte skill is imperative for the graceful "sit down" and poise of a nine-yard circumference.

A GOTHAM BRIDE AT THE BALL.

Another gown to be worn by a young Gotham bride is of rose-colored satin and white ivory, and pompadour lace. The skirt is of the umbrella shape, of voluminous dimensions. The lower half of the skirt is of white ivory satin laced to the knee with bands of pompadour lace. Each crossing of the laces is held by a bunch of tiny pink roses. The upper part of the skirt is of the rose satin with a large Empire sash of pompadour lace, said to have once belonged to Hortense, daughter of Empress Josephine. Folds of rose satin form the very low, sleeveless bodice, which is tied up over the shoulders with bands of pompadour lace. Large wide sleeves of the lace caught above the elbow, complete the costume.

CAMEO AUTOCRAT OF THE DRESSMAKER.

Another autocrat of the dressmaker's art shows a Washington gown of cameo brocade satin—a new fabric. Raised on a pale green ground is a "cameo," a tinted leaf. The skirt is plain. It measures six yards and has crinolines to the knee, which gives the effect of a train to what is really a short skirt. The short-waisted décolleté bodice has huge elbow sleeves lost in ruffles of exquisite lace. Directoire revers of plain green satin, edged with lace, fall in front and back and over the top of the sleeves. The Directoire revers is the latest garniture. Numerous folds of plain green satin form the back with a belt, which fastens in the back with a butterfly bow. A combination of the Empire and the princess style is shown in an inauguration gown of rich white brocade silk. The untrimmed skirt is eight yards round. The princess lace is laced. With this skirt is worn a mauve velvet Empire bodice, outlined in duchesse lace. The short bouffant sleeves are caught with mauve velvet rosettes.

STREET GOWNS FOR WASHINGTON.

Many street gowns of rich silk and velvet, in both light and dark tints, are being made for inauguration wear. Invariably they are short, with seven yards fullness and lined with crinoline to the knee. The trimming extends to the knee, and the sleeves are edged with drooping and the sleeves full to shoulders. For one sleeve three yards of silk is the average quantity.

CHANGES IN BONNETS AND COIFFURES.

Street gowns call for harmonizing hats and bonnets, and here again radical change will be noted.

The accepted shape of bonnet and hat is pike.

All bonnets and not a few hats have lace curtains in the back. Many of the bonnets are trimmed with a metal of Florentine and Tuscan design. Exquisite buckles and pompons and flowers, ranging from palest violet to deepest purple, with many variations of magenta, lend oriental richness to spring millinery.

A bonnet privately imported for a wealthy widow is a perfect fac-simile of the flower form the sides. A curtain of rich Florentine lace falls over the hair in the back, and from a bow knot of the same lace rises a rare Florentine jewel. Pronounced crinolines, and other inaugural innovations. Coiffures are prepared and the leading hair-dressers have wire frames upon which the hair will be rolled at the sides to harmonize with the contour of the voluminous skirts and sleeves. But as this style calls for a very high crown, it is not likely to become popular. The great and diverse commercial interests involved in this upheaval of the fashions, concentrates upon the dame a national consideration scarcely less weighty than that demanded by the silver question.

Practical Home Training.

[London Telegram.]

When manual training, with its domestic economy and its cooking and sewing, was being urged as a necessary part of public school training, teachers and wise men brought forth the argument "that it is not needful for mothers to teach these branches, and our girls are being brought up with their hands idle."

One summer a lady had 260 girls from offices, stores and factories to board during two weeks' vacation. At the end of the summer she found that but nine of the number knew how to make a bed, and many of them made a house of cards of their beds and a bed in their lives." Some of them did not even know whether a sheet or blanket should go on first. And these are not destitute girls, but such as represent our self-respecting wage-earners—girls who were boarders, paying a fair price, yet were expected to make their own beds.

Mothers had not trained them. There are hundreds of bright, intelligent girls of 15, 16, 18 and even older, who have never sewed, and do not know whether a thimble should go on their thumb or finger. What kind of wives and mothers are they to make?

Courtesy of the Sioux Indians.

[Rite Field's Washington.]

If Sioux advances are favored the maiden, after a brief period of courtship, allows his blanket to settle over her head, and thus enveloped she listens as well as she can to a verbal accounting of his deeds of prowess as a hunter, of his possessions in ponies and skins, and to the low chanting of a song in which he pledges his love eternally. If, after listening to this, the maiden is still willing to become his squaw, she tells him so. The blanket is removed from her shoulders, and together they go to the maiden's parents' relative, whom they declare their desire. The match is speedily sanctioned, and when they leave the agency, the wife carries on her shoulders a portion of her husband's rations.

THE RIGHT MAN.

The Rape Fiend Has Been Positively Identified.

Terrica Cassula Says Garcia is the Man Who Assaulted Her.

Her Statement Corroborated by the Boys Who Pursued Him.

His Clothing Also Fully Identified by All the Parties—The Prisoner Refuses to Make Any Statement or Explanation.

The rape fiend has been identified.

José Garcia, the Mexican captured Saturday night by Detectives Auble and Benson, proves to be the villain who assaulted little Terrica Cassula on Wednesday night last.

The Mexican under arrest was positively identified yesterday noon at the jail, by not only the little Cassula girl, who was assaulted, but by George Gierich, the young milkman, and the girl's brother, who chased the fellow over the hills, and who, for a full half hour, followed him with a few feet of him. The Mexican had offered upon his pursuers, holding them at bay, temporarily, and in such manner as to permit the boys to study every lineament of the villain's face and every noticeable contour of his form.

The striped apron taken off Garcia the night of his arrest was placed in such a manner in the jail office as to be seen by the Cassula girl before being confronted by the prisoner, and, while watched closely, the little girl identified that garment, as well as the coat and hat, followed by the young men, the same worn by the assailant the night of the assault, noting that fact to her father, who had accompanied her, and the two boys whom Officer Goodman had brought to identify the prisoner.

The prisoner, José Garcia, was brought out into the light, where, with out hesitation, all three—the girl and two young men—identified him as the man who attempted the dastardly crime.

Garcia preserved a stolid indifference to everything around him, and is not conscious of having been preferred to appear to realize his position. Nothing has been told Garcia, and he has expressed no wish to be informed of even who he is under arrest; still it is hardly possible the man does not appreciate his position, since being confronted by the three, he has been so persistently chased and so unmercifully kept stoning him. If he does, he has unusual nerve, for he has not indicated uneasiness.

Garcia will probably be arraigned today, a formal charge of assault with intent to rape having been preferred against the fellow by the victim's father.

WEARINESS OF DREAMS.

They Frequently Cause That Tired Feeling Which Comes in the Morning.

[London Telegram.]

What the latest scientific view of dreaming now is may be gathered from a lecture which was recently delivered on the subject at the Royal Institution by Dr. B. W. Richardson. In the poet's view, dreams are visitors from the ivory gate, or, as Shakespeare calls them, "children of an idle brain"; but science, which is the enemy of such dreams, says that after all, "nothing more than the common vibrations of terrestrial media acting upon a corporeal vibratorium," like the sound heard on a wire in traction.

The sound heard after it has been struck by a wire, the vibrations of the ether, he went on to say, are the first species, dreams produced by indigestion, pain, or fever; while objective dreams are those started by noises or other events going on outside the sleeper.

This is a fair sample of the ruthless logic which science disposes of superstition. Against the intuitive view of the significance of dreams men of science protest, and will probably continue to protest as long as there are any men of science left. They quote the old lady in the Spectator, who believed that the earthquake of Lisbon had been caused by a giant, who, when he was angry, would shake the world.

planned connection with the fact that a few days before she had happened to spill some salt at table. Yet, if we obey Dr. Richardson and abandon all confidence in dreams as harbingers of the future, what is to become of the dreamers? There is no plan for getting a hero out of a scrape so efficacious as making somebody else dream that he requires assistance and appear just at the nick of time to render it. Again, if the author wants to prepare us for the fact that the world is not what it seems, he is going to perish, he does it, by letting him dream of his own approaching dissolution, after which a cloud of unaccountable melancholy settles down on him until the presentiment is fulfilled. It is kind of novelists to break the news of an approaching catastrophe in this sort of way. If the dream is taken to task, on scientific grounds, they would probably defend themselves by asserting that, although presentiments often turn out utterly mistaken, a percentage of them must, even on scientific grounds, happen to be fulfilled, and that the best way to select these lucky shots and write about them. It might, perhaps, be a useful step, if we desired to banish popular superstitions, to forbid novelists in the future to mention dreams or visions, or to mention at all, and if the output of fiction writers is reduced to quence, it is not at all certain that this would be an occurrence greatly to be deplored. Science has already driven the fictionist up into a corner by depriving him of the support which a plot and a mystery have given him. If a dream of a timely specter, or if a dream, it is the way of ghosts, it is obvious that novel writers will find the area of their imaginative energy painfully circumscribed.

When we feel wearied in the morning, very likely it results from dreams that we have forgotten. If dreams are taken to task, on scientific grounds, they would probably defend themselves by asserting that, although presentiments often turn out utterly mistaken, a percentage of them must, even on scientific grounds, happen to be fulfilled, and that the best way to select these lucky shots and write about them. It might, perhaps, be a useful step, if we desired to banish popular superstitions, to forbid novelists in the future to mention dreams or visions, or to mention at all, and if the output of fiction writers is reduced to quence, it is not at all certain that this would be an occurrence greatly to be deplored. Science has already driven the fictionist up into a corner by depriving him of the support which a plot and a mystery have given him. If a dream of a timely specter, or if a dream, it is the way of ghosts, it is obvious that novel writers will find the area of their imaginative energy painfully circumscribed.

When we feel wearied in the morning, very likely it results from dreams that we have forgotten. If dreams are taken to task, on scientific grounds, they would probably defend themselves by asserting that, although presentiments often turn out utterly mistaken, a percentage of them must, even on scientific grounds, happen to be fulfilled, and that the best way to select these lucky shots and write about them. It might, perhaps, be a useful step, if we desired to banish popular superstitions, to forbid novelists in the future to mention dreams or visions, or to mention at all, and if the output of fiction writers is reduced to quence, it is not at all certain that this would be an occurrence greatly to be deplored. AT THE CHURCHES.

Services at the East Side Presbyterian Church.

The First Anniversary of Rev. Mr. Lavery's Pastorate.

An Interesting and Instructive Sermon by Rev. A. C. Smith.

Usual Sunday Services at the Church of the Unity—A Plea for Peace and Work by Presbyterian Ministers—Good Movement.

The services at the Second Presbyterian Church, East Los Angeles, yesterday were unusually interesting and impressive. They were conducted by the pastor, Rev. F. S. Lavery, it being the first anniversary of his coming to this people. Six young men and three young women were admitted to membership on profession of faith, and two by letter from other churches. The sacrament of baptism was administered to one infant and one adult.

From the text found in John xi. 9-10, the pastor gave a most earnest discourse, urging his people to go forward in the line of duty and to decide that duty by God's will and not their own inclination. He commended them for their assistance, their love, and for the sacrifice they had made in giving of their earthly means to carry on God's work. He urged them to continue the good work, and as the duty that lies nearest to enlarge their church building. He spoke, too, of how richly God had blessed them as a church in the saving of souls in the year just past. At the beginning there was a membership of 187; now there are upon the church roll 287 names, 181 having united during the year.

The church was beautifully decorated in honor of the day. Bouquets of roses, festoons of palm fronds, ferns and callas were arranged with pleasing effect.

Taking it all together, it was a day long to be remembered in the history of this church, 101 of whom were upon profession.

Rev. A. C. Smith preached a sermon last night on the "Rich Man and Lazarus." After reciting the Saviour's description of the men in this world, and their respective condition in the spirit land, the speaker entered a study of the two men, showing that the one was not punished because he was rich, and the other saved because he was a beggar. It was his character that fixed their destinies. The beggar, as his name and destiny indicate, was a man who lived in the fear of God, while the rich man was intensely worldly, and found his greatest happiness in the pleasures of this life. He was selfish, inhuman, else he would have given aid to the beggar who lay dying at his gate. He cared nothing for the future, made no preparation for the future life. He faced in unprepared. If we judge from the message he desired sent to his brothers, he was skeptical. Moses and the prophets were not sufficient to prove to him the verities of the future.

In this parable we have the veil of the future lifted and get a view of the land of spirits. We are impressed with the closeness of the spirit land to our own. Only a breath separates the two. Men are judged there and their destiny is fixed by character, and not the conditions of life. God is no respecter of persons. What we are in this life we shall be in the future; for death is merely a translation, and not a transformation. It is not more marvelous that a man should continue his life in the future than that he should live at all. It is wise when laying a foundation for a character, to make it broad and strong, based upon Christ. This glimpse of the future further indicates that men retain their faculties and capacities there as here, that memory loses none of its magic powers, that the cruel pain of suffering continues, that we are not in a dream, that there is a fixed gap between the righteous and the unrighteous, and there is such in this life, in purpose, if not in place of habitation. It is further shown in this parable that people in the spirit land do not lose their interest in the conflicts of this, but watch with intense interest their daily warfare. While unrighteous Dives was suffering, tormented, right Lazarus was in comfort, joy, peace. Each person by the power of choice and by action decides his own destiny. In the pursuit of eternity fraught with such tremendous consequences, it is well for all the living to stand in readiness for the mysterious change brought by death.

CHURCH OF THE UNITY.
Dr. Thomson preached yesterday morning to his usual large congregation upon "The Mantle of Elijah," taking his text from II Kings, ii, 15: "The spirit of Elijah doth rest upon Elisha." He announced at the close that the topic for his next Sunday morning's discourse had been selected at the request of several members of the congregation, and would be upon "The Nature and Necessity of Faith."

PACIFIC GOSPEL UNION.
Maj. George A. Hilton, the superintendent, addressed a large audience on the subject, "Ingratitude." The major took as the Scripture lesson, from Luke xiv, the story of the cleansing of the ten lepers. The text was: "Where there were not ten cleansed; but where are the nine?" The tendency of men to receive favors from God, continually, and never acknowledge the favors by glorifying God, or thanking Him. The man who gets into difficulties, and asks God to help him out, and is helped, and forgets to thank God for the assistance, and goes on in his way sinning, was vividly compared to the nine lepers who were cleansed and neglected to thank the Lord for the cleansing.

The "hobo" who pretends Christianity for the purpose of obtaining clothing, etc., from the mission was sharply scored, and showed clearly that the major was well versed in the ways of the "hobo."

The sinner out of Christ was compared to the leper, and the sinner redeemed by Christ should glorify God like the one leper who returned to Christ to thank Him. Preceding the sermon a thirty-minute service was led by A. M. Hare, Mrs. J. B. Brown sang, "Just the Same Jesus Today," and Mrs. Brown and Mr. Hare sang "Drifting Away From God." In the morning the regular Sunday morning free breakfast was served to 107 persons. The breakfast meeting was addressed by Brother Cornwell.

A PLEA FOR PEACE AND WORK.
A plea for peace and work signed by 336 Presbyterians, ministers has just been promulgated. It is a protest, moderate, yet firm in tone, against the attempt now being made to impose a new test of orthodoxy on ministers of the Presbyterian Church. This "plea" is regarded as one of the most important

movements that has taken place in the Presbyterian Church for half a century, and is causing much discussion in church circles throughout the country. The document in full, with the signatures omitted, is as follows:

Feb. 17, 1893.—To those who are actively engaged in the ministry of Christ, the chief interest and the first duty is the bringing of the simple gospel home to the hearts and lives of men.

This is the great work of the church to which everything else must give way. She can only win the favor of God and the love of men by the extremes of dogmatic error and of preaching and practicing plain Christianity.

As ministers of Jesus Christ, and working in the midst of the church, we are filled with the gravest fears lest the usefulness of the church should be hindered, her peace disturbed, and her honor diminished by the prevalent theological controversy and strife over doctrines which are not essential.

We remember that there have been two sides to the question of our church in which this happened. We remember that our church has been twice rent asunder by issues which have been recognized shortly after by the church at large. We remember the possibility of such a thing happening to us again, and we are already weary of the strife of tongues, and are longing for peace and united work. We feel that we do not speak for ourselves alone, but for the great multitude who hold the same conviction in regard to the first duty and main work of the church, while representing at the same time many different shades of theological opinion.

It is in this spirit that we join our voices in a plain, straightforward, fraternal expression of the desire for harmony and united devotion to practical work. For this reason we deprecate any and every attempt to impose new tests of orthodoxy, or to restrict the liberty of honest expression by those who sincerely subscribe to the essential and necessary articles of the Presbyterian Church. Especially would we deprecate any addition by formal resolution, or by judicial decision, to the confessional statement of the doctrine of holy scripture as the word of God, the only infallible and essential to religion, but differing as we may in regard to the abstract truth of that theory, we protest unitedly and firmly against making assent to it a condition of membership in the church, or of standing in the Presbyterian ministry.

In the interests of Christian liberty, in the interests of peace and unity, in the interests of mission and progress, we take this position clearly and firmly, and we cordially invite all who agree with us to cooperate in maintaining these principles, and in the end of the commandment is love out of a pure heart, and a good conscience and a faith unfeigned; and that the surest defense of the truth is its unflinching proclamation.

Among the signatures attached to this plea are the names of two California ministers, Rev. Dr. Adams of San Francisco and Rev. Dr. Chichester of Los Angeles.

SETTLE UP THE COUNTRY.

Some Good Advice to Colored People Who Expect to Come to California.

Thomas Matthews of this city has written a letter to W. W. Meadows of Chattanooga, Tenn., regarding the advantages and disadvantages of Los Angeles and vicinity as a desirable place for colored people wishing to locate here and become citizens. The letter has been published in the Chattanooga Observer, a colored organ of that place. Space does not permit its entire reproduction, but the following contains the principal facts embodied in it. Under date of February 7 the writer states that he has written at the request of several colored gentlemen of this city. Following it he writes at length, advising colored people against flocking into the cities, and says:

Our advice is to go fifty or seventy-five miles from the city, where lands are cheap, and where produce can be sold at a comparatively small expense. These lands watered and improved will be worth at least \$100 to \$125 per acre and money-making prospects were never better than now in the farming districts of Southern California. We welcome all respectable colored people who are disposed to cast their lot among us. Our proposition in respect to these lands will stand investigation, for we can show you flowing wells right on them. We do not want you to wait for another season with its possible advances in prices. It is a suitable place for a good farming colony, and that is what we are going to have, subject to the approval of reliable colored gentlemen."

Granted a Divorce.

The San Francisco Chronicle of Saturday has the following:

"Helena Burroughs was an applicant in court yesterday for a divorce from Silas Burroughs. The plaintiff had a rather pitiful tale to tell the judge. She is a young woman with two little children. Some three years ago her husband disappeared from Oakland and it was a long time before she heard from him. She finally received information that her missing husband was serving time in San Quentin under the name of W. W. Wyman. An investigation was made and it was found that Burroughs was a felon. He was sent to prison for one year from Los Angeles for forgery. This time was served, and recently he was convicted in Napa for forgery and is serving a seven years' sentence. The plaintiff was granted a divorce as prayed for, and was given the custody of the two minor children."

A Review in Fifteen Languages.

Russian reviews are not often met with outside of Russia, but they are bulky to a degree elsewhere unknown, and one of them would make four or five of our monthly magazines. Yet the newest of them leaves all the rest behind. It is the Pantobiblion, published at St. Petersburg in no fewer than fifteen different languages, and its aim is to provide professional and scientific men of all countries with a cue to the periodical literature, technical and scientific, of the world. This is a colossal undertaking, even for unprovin-

cial St. Petersburg.

SERIOUS ACCIDENT.

A Runaway That Came Near Resulting Disastrously.

A runaway occurred on Temple street yesterday afternoon which would have resulted disastrously had it not been for the bravery of Peter Hoffman, a butcher who lives on Temple street, west of Pearl. W. R. Ream, of the Times local staff, was out driving with his family, consisting of his wife and three children. At the corner of Temple and Pearl streets he started down the steep hill going west on Temple street, when the horse became unmanageable, and started on a run. Mr. Ream held on to the lines until he was jerked from the vehicle, striking on his back against the curb. The horse continued down the hill, but was caught by Mr. Hoffman before any further damage was done. Mrs. Ream retaining her presence of mind, and remaining in the vehicle with her children, Mr. Hoffman was quite badly bruised up about the head and face, but is not seriously injured. Dr. Bryant, the police surgeon, was sent for, when Mr. Ream, who was suffering great pain, was made as comfortable as possible, after which he was sent to his residence on South Grand avenue. It was a very narrow escape, and, but for the bravery of Mr. Hoffman, it is more than probable that some one would have been killed. Mr. Ream was doing as well as could be expected last evening. He was in great pain, but no bones are broken, and he is not believed that there are any internal injuries. As it is, he will probably be confined to the house for several days. In explaining the cause of the runaway, Mr. Ream said the horse, which was hired from a livery stable, had a sore mouth, which made it difficult to guide him. In starting down the hill, he, of course, held back on the reins, which hurt the horses mouth, and he started to run, and got beyond his control.

An Afflicted Family.

Daniel D. Hazard, one of the pioneers of Los Angeles county, whose death occurred the 15th inst. at Riverside, left a peculiarly afflicted family. His oldest son died on the 5th inst, and only the father and daughter were able to attend the funeral. Mrs. Hazard and the three younger children being sick. The day following Mr. Hazard was stricken with illness from which he never recovered. The many friends of the family will be glad to learn of a gradual improvement in Mrs. Hazard's condition.

Riotous Highlanders.

The two opposing highlander companies, the Hop Sing Tong and the Bing On Tong combinations, were making preparations to "meet" last night, but a cord of wheat being drawn around the proposed battle-ground averted what might have been a fight.

SPORTING NEWS.

The Spring Running Meeting Abandoned.

The Small Number of Entries from the North the Cause.

Some of the Changes Necessitated by the New Baseball Rules.

Blaring Inconsistencies in Many Particulars—The Coming Football Match—Something about the Records of Trotting Horses.

The much-talked-of spring running meeting, which had been arranged for March 13 and following week, in this city, by the Sixth District Agricultural Association, has been abandoned and the programme declared off, the reason assigned being that the small number of entries received from the North precluded the possibility of its being carried out except at great financial loss to its promoters.

BASEBALL.

A Revision of the Rules Necessitated by the New Regulations.

The Committee on Rules in the National League completed its labors with the following result:

First—No enlargement of the infield now in use.

Second—Removal of the pitcher from his present position to the center of the infield; abolish the pitcher's box and substitute therefor a boundary plate covering a twelve-inch space, to which the pitcher will be confined.

Third—Abolition of the flat bat.

Fourth—A lucid definition of a balk ball.

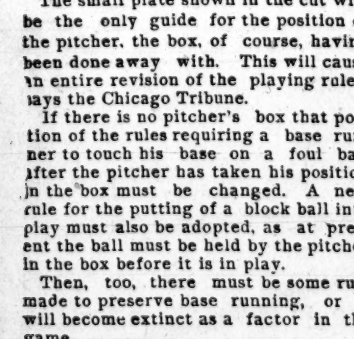

Fifth—A simplification of the rules pertaining to the actual playing of a game.

Sixth—The codifying of all rules relating to the duties, powers and responsibilities of umpires.

Seventh—A rule governing official scorers which provides that a player who makes a sacrifice hit, which advances a base runner, shall not be charged with a time at bat.

The most important of the changes is the moving back of the pitcher a distance of over eight feet.

The result of the change will be shown in the subjoined diagram:

The small plate shown in the cut will be the only guide for the position of the pitcher, the box, of course, having been done away with. This will cause an entire revision of the playing rules, says the Chicago Tribune.

If there is no pitcher's box that portion of the rules requiring a base runner to touch his base on a foul ball after the pitcher has taken his position in the box must be changed. A new rule for the putting of a block ball into play must also be adopted, as at present the ball must be held by the pitcher in the box before it is in play.

Then, too, there must be some rule made to prevent the pitcher from throwing the ball back to the pitcher or it will become extinct as a factor in the game.

It can be seen from the diagram that a pitcher from his position can keep watch on first and third base all the time, and is always in position to throw to them, while the base runner is compelled to turn half way round to throw to either first or third. The small square just back of the present box shows the proposed plate behind which the pitcher's front foot must land. Before he delivers the ball he will be at least five feet back of this slab, so that it is easy to see how closely he can guard first base.

The putting of the pitcher back makes it impossible for him to field a bunt. The abolition of the flat bat will not do away with the bunt. If the pitcher is to be moved back and free hitting is encouraged the bunt should have been abolished.

The Committee on Rules is inconsistent to say the least. It encourages sacrifice hitting and bunting, yet legislates with a view to securing free hitting.

With such absurd inconsistencies in its first efforts, its "promised simplification of the rules" and "lucid definition of a balk" will be looked for with interest.

BASEBALL NOTES.

The New Yorks will open their season April 1.

Pat Powers will sever his connection with the Giants.

Washington is figuring on Latham, Wise, Sullivan and Joyce for its infield.

There are now but two outfielders to be signed to complete the Los Angeles team.

The championship season this year will probably open about May 1 and close on October 1.

Keeler, one of the most promising of last year's crop of young players, has been signed as third baseman of the New Yorks.

years ago, would just as soon have thought of taking a leap off the Washington monument as to think of signing for anything less than \$300 a month. The minor leagues have, for the first time in the last ten seasons, gotten salaries down to a basis where there is a chance to live through the season and have a little something for their trouble.

Fouts is John Ward's successor as manager of the Brooklyn club. President Byrne is quoted as saying that Fouts has signed to manage and to pitch for the team. Darby O'Brien, who is now in Illinois, will captain the team. He has also been signed. President Byrne has sent a contract to Pitcher Lovett, and the latter is expected to sign it. If there is no slip-up in the arrangements, the make-up of the Brooklyn team for this year will be as follows: Pitchers, Stein, Haddock, Lovett, Kennedy and Fouts; catchers, Con Daily and Kinslow; first base, Brouters; second base, Richardson; third base, Tom Daly; shortstop, Conroy; fielders, O'Brien, Griffin and Tom Burns.

Speaking of the Washington baseball team recently, George Wagner, president of the club, said: "The infield looks like Latham, Wise, Sullivan and Joyce; the outfield like Jim O'Rourke, Hoy and Radford, and the pitchers like Kullen, Sullivan, Muto and Fouts. They are a little bit in doubt in regard to our catchers, but I think we shall have a different lot from last year. We shall probably try some young blood. Danny Richardson is not likely to play with us next season. New York, Brooklyn and Pittsburgh want him, and the one which offers us the best bargain in the way of players will get him. Joe Muivey will probably be signed for a substitute infielder."

FOOTBALL.

An Exciting Match Promised for Next Saturday Afternoon.

The football match to take place next Saturday afternoon at Athletic Park between the Chaffey College team of Ontario and the Olive team of this city promises to be the most exciting contest ever seen here, as the two teams are evenly matched and the one which offers us the best bargain in the way of players will get him. Joe Muivey will probably be signed for a substitute infielder."

The Chaffey have the advantage of being coached by a well-known member of the University of Michigan team. They play a very scientific game. The Olive also have had the benefit of training under the instruction of a member of the Berkeley team. They put up a very strong game, and their strength is especially shown behind the line. As the game will undoubtedly be close, and as it will probably be about the last game this season, a large crowd will certainly be on hand.

OFFICIAL TROTTER RECORDS.

Something about the Inside Workings of the Register Office.

So much of the sensational on the horse side of the Stamboul record market has appeared that Registrar J. H. Steiner has decided to speak of the inside workings of the register office in handling records of technical irregularity, says the Chicago Herald. "In the mass of evidence as to the actual time made by Stamboul on October 23," he said, "there was some to show that he trotted in 2:07 1/4 and some that he did not. This evidence was not presented to the board because it was not necessary to go into that branch of the case. Sufficient incontroverted testimony having been offered to show that the performances were irregular. The press has charged fraud, but the register as a body is not a party to the fraud. It can only accept or reject time made in performances. There being already sufficient evidence of an unquestionable character to require rejection it was no going further. If all the requirements for the register rules had been complied with, then the question of fraud would have been investigated to determine whether the performance should be accepted or not. If the California board of review decides the Stamboul records would be rejected, the register association, which is a distinct and independent of each other. The trotting associations charge a horse with his fastest performance for the purpose of classification, whether regular or irregular, in order to prevent him from entering in the class of a better horse. The register association is a penalty against a horse. The register association is the property of the breeders and a record accepted by it is a mark of credit to the horse, and also a credit to all other animals coming in the same class. Therefore the performances are closely watched to see that no horse gets a credit mark that does not belong to him in accordance with the rules adopted by the register association. The rejected Stamboul records will appear in the Year Book as rejected performances. As to their recognition as records by the American Trotting Association I cannot say, but as its secretary and executive officer I would treat all rejected performances as bars, which, as a matter of fact, is all that any record is, so far as the trotting associations are concerned, and I believe the association would sustain me in this position in the future as it has done in the past."

Sporting Notes.

Jim Daly had agreed to fight Alex Greggins at 158 pounds.

Wallace Rose announces that he will leave for England shortly to row Buebar.

If Tom Williams wins his coming match with Billy Smith he will challenge Dick Burge.

The New Orleans betting on the coming fights is as follows: Fitzsimmons 7 to 10, Hal 11 to 10, Goddard 1 to 4, Smith 5 to 2, Ryan 4 to 1, Dawson 9 to 10.

T. S. Bellin of Albany, N. Y., has imported a prize-winning bull terrier named Surefoot, a dog that has won first prize at nearly all the principal English shows.

It is rumored that Oliver S. Campbell, the lawn tennis champion of America, has decided to retire and will not defend his title to the championship at Newport next August.

George Dixon has posted \$500 forfeit money, with a challenge to Johnny Griffin, for a fight at 120 pounds, \$10,000 a side and the biggest purse that any athletic club will offer.

Bill McCarthy of Australia and Jack Magee of Boston have been matched to fight ten rounds on March 20 at the Coney Island Athletic Club. Steve Broke, McCarthy's backer, will bet \$1000 on the outside. McCarthy will also be matched to fight the "Marine."

Dr. Sauveur, proprietor of the Seminoles Kennels, Chestnut Hill, Pa., has purchased a male dog named Thomas H. Street, of Ormskirke, England, and a crack collie Ormskirke Gold Dust and a young collie bitch, Ormskirke Princess, by Ormskirke Chieftain, out of Goonagh Countess. The prices paid for the pair

was \$2500. The dog, who is only 10 months old, is the main object of the deal. He has just won four first and four special prizes at the Liverpool show and the 50-guinea challenge cup for collies under 18 months old.

The Coney Island Athletic Club has selected April 18 as the date of the match between Billy Smith of Boston and Tom Williams of Australia. The principals will fight for \$5000, of which the loser will receive \$500.

Ernest Roeder, the wrestler, who will meet Evan Lewis, in the Olympic Club, for the championship, March 2, arrived at Bay St. Louis Saturday, and is quartered at Bob Fitzsimmons's house. The wrestler and fighter will hereafter do their road and gymnastic work together.

The Turf, Field and Farm narrows the American Derby field to the following: Longfellow, Cladwell, Cladwell, Eltham, Queen, Floodgate, Gov. Foraker, G. W. Johnson, Tyro, Hugh Penn, Lady Violet, Lookout, Monowal, Picton, Rainbow, St. Croix, Sir Francis, Ramapo, The Reaper, Tobe Bell and Runyon.

W. A. Wadsworth, the New York State sportsman, is the latest addition to the thoroughbred breeding ranks. He has purchased at Tattersall's the imported stallion, Devil to Pay, 10, by Robert the Devil—Polonaise, by Adventurer, and will gather a select stud. The stallion is a magnificent animal, and was a good racehorse.

F. W. Spicer, of Dexter, N. Y., on Friday sailed his big yacht over a measured course on the St. Lawrence, in a game of wind, in 1 minute 42 seconds, or at the rate of nearly one hundred miles an hour. This comes close to the famous record made by the Scud during the early part of the '80s, when she ran a mile and a quarter in just 45 seconds.

Joseph Darby, the champion jumper of the world, and the holder of the champion belt, will make an early visit to America. Darby has a record for doing many feats which no other jumper in the world has ever accomplished. His exhibition on this side of the water will undoubtedly create a sensation, as this will be his first visit to America. His home is in Birmingham, England.

The news that the Cambridge and Oxford crews had accepted the invitation of the Chicago Navy to row at the World's Fair next summer has not changed the attitude here. In the matter, Capt. Ives of the Yale crew, says he will not go to Chicago, as it was believed that professionals would be encountered, and, besides, the climate at Chicago would not agree with his men. Harvard, he said, held the same views.

The 84-foot yacht Navaho, built at Herreshoff's yards for Royal Phipps Carroll, was launched Saturday. She looks every inch a racer, and is not unlike the Waip in general appearance. This boat is to cross the ocean to England to race for the Cape May and Brenton's Reef and Royal Victoria cups. She is expected to be held during the summer of 1933, when the America will over and won the Squadron cup.

Insignias, by Isomony-Deadlock, is the reigning favorite of the Epsom Derby. The colt has an unbeaten record. His first start was for a maiden plate at Newark, May 13, for which he beat Sweet Laura, Quaker and Wise and others over the course. His second essay was at Ascot, where he beat the New States, beating Feiler, Ravensbury and seven others. His third and last start was at the Newark October, where he won the Middle Park plate in brilliant fashion, beating the best of the two-year-olds in England unopposed.

James Collins, an English sprinter, with a number of other runners of equal merit, have arrived in Chicago, and recently had a conference with J. C. Ryan, the promoter of the International Association, which is to be held during the World's Fair period. The match will be different from any other ever run on this side of the Atlantic, inasmuch as the Sheffield rules will prevail. Under the rules every man is handicapped according to his record. Arguments for the register rules have been complied with, then the question of fraud would have been investigated to determine whether the performance should be accepted or not. If the California board of review decides the Stamboul records would be rejected, the register association, which is a distinct and independent of each other. The trotting associations charge a horse with his fastest performance for the purpose of classification, whether regular or irregular, in order to prevent him from entering in the class of a better horse. The register association is a penalty against a horse. The register association is the property of the breeders and a record accepted by it is a mark of credit to the horse, and also a credit to all other animals coming in the same class. Therefore the performances are closely watched to see that no horse gets a credit mark that does not belong to him in accordance with the rules adopted by the register association. The rejected Stamboul records will appear in the Year Book as rejected performances. As to their recognition as records by the American Trotting Association I cannot say, but as its secretary and executive officer I would treat all rejected performances as bars, which, as a matter of fact, is all that any record is, so far as the trotting associations are concerned, and I believe the association would sustain me in this position in the future as it has done in the past."

The entries for the handicaps at Washington Park bear out all that was said for them in advance of the nominations. The meeting, which will begin in earnest, will be the greatest in the history of the track. This fact was made almost certain when the value of the American Derby and the Isabella stakes was announced, but the nominations for the handicaps make the success of the meeting doubly certain. There are 18 entries in the American Derby, the Columbus handicap and the Isabella stakes embrace not only the best horses of the South and West, but the pick of the thoroughbreds in the East. As a matter of fact the list of Columbus handicap horses is the most brilliant ever compiled in the country. [New York Mail and Express.]

Jim Hall will travel to New Orleans in royal style. A special train has been engaged to convey the Australian boxer and his friends to New Orleans, and everything will be done to insure his comfort on the road. This train will leave for New Orleans on the 28th of March, and will stop at New Orleans, New York City, March 28, stopping overnight at 10:30 that night to take on a number of Hall's friends who want to journey South after the inauguration festivities are over. This train will be made up of eight or more Pullman cars, and a baggage car, and a Pullman car, which will be lit up at the 30 day of January, 1933, the following resolution was unanimously adopted:

"Be it resolved, that a meeting of the stockholders of the California Bank be called for the purpose of voting upon the proposition to diminish the capital stock and surplus fund of said bank, so that said bank shall have a capital stock of two hundred and fifty thousand dollars, divided into twenty-five hundred shares of the par value of one dollar each, each fully paid up. That certificates for stock now outstanding be called in and cancelled, and that the bank shall have a cash stock of two hundred and fifty thousand dollars, divided into twenty-five hundred shares of the par value of one dollar each, each fully paid up. That certificates for stock now outstanding be called in and cancelled, and that the bank shall have a cash stock of two hundred and fifty thousand dollars, divided into twenty-five hundred shares of the par value of one dollar each, each fully paid up. That certificates for stock now outstanding be called in and cancelled, and that the bank shall have a cash stock of two hundred and fifty thousand dollars, divided into twenty-five hundred shares of the par value of one dollar each, each fully paid up. That certificates for stock now outstanding be called in and cancelled, and that the bank shall have a cash stock of two hundred and fifty thousand dollars, divided into twenty-five hundred shares of the par value of one dollar each, each fully paid up. CITY BRIEFS

NEWS AND BUSINESS.

Weather Bureau.
U. S. WEATHER OFFICE, LOS ANGELES, Feb. 26, 1893.—At 5 a.m. the barometer registered 29.76; at 5 p.m., 29.81. Thermometer for corresponding hours showed 49° and 58°. Maximum temperature, 60°; minimum temperature, 45°. Character of weather, partly cloudy. Rainfall past 24 hours, .02; rainfall for season, 17.48.

Miss Susan Hale's interpretation of Sir Charles Grandison, given for the benefit of the Woman's Exchange, No. 233 South Broadway, Thursday evening, March 2, will be one of the leading literary and social events of the week. Miss Hale's piquant and vivacious rendering of her subject is irresistible. All should avail themselves of the opportunity to hear her. Sixty cents worth of garden seeds, 80¢, minimum temperature, 45°. Character of weather, partly cloudy. Rainfall past 24 hours, .02; rainfall for season, 17.48.

Engineers and all persons whose occupation disarranges the lower bowels in their proper functions should use Bellan's La Grippe Specific. It is good for other things besides the gripe.

The "Little Soldier" school shoe. They are made right—genuine kangaroo top, best sole leather, spring heels. Try a pair. Price \$1.50. Sizes 9 to 13. Hewes, No. 105 North Spring.

Floor space, suitable for light machinery, where power may be introduced, for rent on third floor of Times Building. Also first-class offices on same floor.

Jewell Grand, New Process and all the other Jewell stores, for gasolines and gas at A. B. Chapman's, No. 414 South Spring.

Before you buy your lumber get your figures from Clark & Bryson, wholesale and retail lumber dealers, 114 South Spring.

Mantels, tiles, office fittings, hardwood lumber, H. Bohman, 514 South Spring. If you want an orange farm or land, see ad. of W. P. McIntosh in another column.

Buttons holes and buttons made to order at Zinnman's, No. 223 South Broadway.

Let K. & K., the Broadway tailors, make you a spring suit. 214 South Broadway.

James Mean's \$3 shoes; sole agents, Boston Shoe Store, corner Main and Second.

Beiton's Pile Salve is a sure cure for piles in all its forms. Sold at all drug stores. Kan-Koo's clearance sale begins Monday, March 6, see ad.

Indian and Mexican goods at Campbell's.

The City Council will meet at 10 o'clock this morning.

There was quite an increase in travel to the seashore yesterday.

There were just twenty-six people registered from St. Paul, Minn., at the two leading hotels yesterday.

Work on the smelter is to be pushed as rapidly as possible, and it is believed that it will be in operation within the next six months.

It was reported yesterday that Joe Taggart had sold his Arizona mine for \$40,000 cash on Saturday, and that the money had been paid.

The concert at Westlake Park yesterday afternoon was largely attended, both the electric and cable cars doing a good business during the afternoon.

There are undelivered telegrams at the Western Union Telegraph office for Nathan P. Roberts, G. H. Adams, Mrs. Theodore Savage, "Stock" (cable), Jesse Stom.

At the regular monthly social meeting of the Unity Club, to be held next Wednesday evening, Dr. J. S. Thomson will give a short talk upon "The Ins and Outs of a Clergyman's Experience."

A light rain set in shortly after midnight Sunday morning, and continued at intervals until after daylight, during which time .02 of an inch fell, bringing the total for the season up to 17.48 inches.

A correspondent writes that this in regard to the Briggs-Townsend damage case, recently decided by the Supreme Court, laying stress on the fact that Mr. Briggs finally spoke plainly to the matter before finally ordering him from his place, and arguing that an injustice had been done in the matter.

PERSONALS

William O. O'Neill of Prescott, Ariz., is in the city.

J. S. Temple, a prominent Idaho mining man, is in the city.

W. T. McNealey of San Diego came in over the Surf line last evening.

James S. Bates of Kansas City is in the city and will remain several days.

Maj. G. McAlpine and Mrs. McAlpine of Bakersfield, are visiting in the city.

Messrs. J. S. Brishen and William Gettis of Denver, were among yesterday's arrivals.

Hon. W. G. Stewart, the late nominee of the Republicans of Arizona as delegate to Congress, arrived from his home in Flagstaff yesterday.

Paul T. Markoff, L. D. Eldridge and W. S. Emory are a trio of Grand Rapids, Mich., gentlemen bent on pleasure in Southern California, who arrived in the city yesterday.

Bill Nye yesterday joined his wife, who arrived Saturday. The humorist, with a number of friends, started out early yesterday to take in the sights of Los Angeles and vicinity.

Mr. and Mrs. Fred N. Henshaw of Waban, Mass., who are making a tour of this State, having come via New Orleans, are now in this city. Guests of Mr. and Mrs. Thomas G. Barnard, No. 921 South Hill street.

Chicago Stupidity.

(Chicago Tribune.)

And then George took courage. Timid Youth. Miss Gracie, perhaps my coming here so often may seem to you to smack of undue persistency.

Demure Maiden. George, your coming here has never smacked of anything yet.

The Annexation Mania. (Memphis Appeal-Advance.) King Teberurismo of Butavari declares to be annexed too. Why not marry him off to Liliputianlandewiki!

THE GREAT REGISTER.

Extra copies of the Great Register of voters in Los Angeles, just printed, may be had at THE TIMES counting-room. Price 25¢.

WHAT is more attractive than a pretty face with a fresh, bright complexion? For it, use PINKET'S POWDER.

NEW AND OLD BOOKS, magazines, etc. Book Exchange, cor. Second and Main.

W. B. TULLIS, watchmaker, 405 S. Spring.

SOWERBROW, Stephens, Mott & Mar tel.

OREAN PUFF self-raising wheat flour. MOTHERS, be sure and always use Mrs. Winslow's Soothing Syrup for your children while teething. It is the best of all.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

THE WAR IN KANSAS.

Hon. Joab Mulvane Discusses the Recent Legislative Troubles.

The Action of the Populists a Disgrace to the State—The Full Story Has Never Been Told to the World.

"The truism that 'Kansas has made more history than any other Commonwealth in the Union' was never more forcibly illustrated than since the convening of this winter's Legislature in that State," remarked Hon. Joab Mulvane, a prominent Topeka (Kan.) banker and railroad builder, last evening. "The early border warfare between the 'Red Legs' and 'Bushwhackers' was fraught with more bloodshed and real suffering and hardships, but the excitement of those days, much of which I knew and experienced, was not greater than the trials just passed through, and the results were no more serious than they would have been this winter had there been a clash."

"Bloodshed was averted by the cool-headedness displayed by Sheriff Wilkinson of Shawnee county. Had there been committed one overt act by the Populists, all the influence of that official would have been as naught—and therein laid his strength, for, while openly opposed to the actions of the Governor and the Populist wing of the House of Representatives, and openly hostile to the fire-eating minions—Clemmens, Doster, Webb, et al.—Wilkinson had the force of character to restrain the opposition."

"That Gov. Leavelling was wrong from the start, and allowed himself to be guided by a blood-thirsty lot of avowed Anarchists—as Clemmens, who was a leader in the scenes that led to the Haymarket disaster by the Chicago Anarchists—no one pretends to deny. That he endeavored to usurp the functions of the judiciary, while overstepping his privileges as executive, is patent to all who know the circumstances."

"The Associated Press dispatches did not depict the enormity of the proceedings as they existed, as there was a desire to preserve what respectability was possible, and the better element used their influence to have much suppressed that would have worked harm to the State and her interests, as they did with the local press and resident correspondents of outside newspapers, and with success, although many of the larger newspapers in the East who sent special correspondents to Topeka to report the disgraceful scenes there enacted got in their deadly work, although not especially exaggerating the affair, which must have some effect with Eastern capitalists, if badly needed, but will fight shy of Kansas for awhile, at least."

"Oh, yes; 'Kansas will right herself,' as Col. Carey of Wichita remarked in the interview published in this morning's Times; that is one of Kansas' traits. Kansas has gone through every scourge except yellow fever, I guess—border warfare, galore, drought, grasshoppers, blizzards, cyclones, booms and a siege of Populist domination—and still the old flag waves!"

"Surprised at the decision of the State Supreme Court in declaring the minority Populist house illegal? Why, no! There could have been no other decision, as there was no basis for any other. The Republicans have 68 out of the 125 members of the lower house without a question of doubt; that fact is not denied by the Populists themselves. The Senate and Governor cannot enact laws in opposition to a majority of the lower house in any State, and should not be permitted to do so."

"This will end the Populists in Kansas. The better element of Populists are already so disgusted as to have withdrawn their fealty to the party, and the desertions from the Populist ranks will occur by hundreds as soon as the enormity of this whole affair has time to permeate the befuddled brains of the followers of that ism. There will not be a corporal guard to follow the Populist party to its grave two years from last election day, and Gabriel and all his bugles couldn't disturb the penitents from their penance of sack cloth and ashes."

"The scenes at the State Capitol building and grounds, in fact, in the city of Topeka, would beggar description. The Executive and his State officers and staff and the higher body of the Legislature, clothed with all their power and holding the keys and treasure of the State, openly, persistently, successfully opposed by the citizens in their might backed by right. Troops of State militia drawn into line and guarding every point of vantage, every ingress and egress; cordons of troops thrown around the State house; the Senate and minority House manufacturing illegal laws and taking money illegally from the State's Treasurer with the Chief Executive as their aide and abettor and in defiance of the people and the higher judiciary who impeached them. Is it a wonder the people, the respectable element, arose in their might to protest? Is it not a miracle that warfare in its most horrible and ferocious form did not break out? Is it a wonder that the State militia, composed of the young men of the best families of the State, should refuse to execute the orders of the Governor? Is it a wonder that the whole people of the State slept upon their arms? Is it a wonder the eyes of the civilized world were turned toward Kansas?"

ple, the respectable element, arose in their might to protest? Is it not a miracle that warfare in its most horrible and ferocious form did not break out? Is it a wonder that the State militia, composed of the young men of the best families of the State, should refuse to execute the orders of the Governor? Is it a wonder that the whole people of the State slept upon their arms? Is it a wonder the eyes of the civilized world were turned toward Kansas?"

FRANCIS AND LITTLE.

The Men Identified as Notorious Petty Thieves.

James Francis and John Little, who were arrested Saturday night as drunks with suspicion of petty thieving resting against them, have both been identified as parties who have been guilty of the crimes of which they were suspected. Little is the fellow who stole the shoes, as detailed in yesterday morning's Times, and Francis is a sneak who has been purloining, from time to time, liquor and wines from Vaché Bros.' liquor store on the corner of Alameda and Commercial streets. Francis's plan was to go into the back room of the store, noted and read the newspapers. In that part of the store were bottled goods in profusion, and when not watched he would pocket a bottle and stroll out.

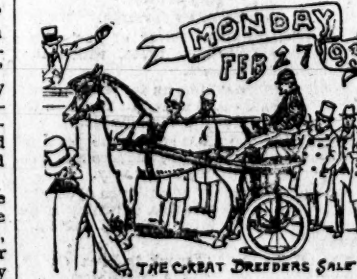

The stock was noticed to be short on several occasions, and a watch was set; result, Francis detected as the thief. Francis, noticing that he was caught, beat a hasty retreat, with the barkeeper hot on his track and gaining—Francis being partly drunk. As the barkeeper reached out to grasp his man, Francis suddenly turned and with a sure aim broke the bottle over his pursuer's head, which knocked out the barkeeper. Francis, escaping, only to be caught later, drunker than ever. As the fellow was broke, it is presumed he had worked his game elsewhere.

Little was identified by the second-hand dealer as the man who sold him the shoes recovered by the police, and the shoe dealer identified the goods as those stolen from in front of his store—hence there are clear cases against both.

Inequality of Finance.

(London Truth.)

Some of the hardships resulting from the fall of the rupee to persons with fixed incomes are inevitable; some, on the other hand, seem to be due quite as much to red tape as to the cause of the currency. For instance, daughters of deceased members of the Bengal civil service, whose fathers contributed to the pension fund, are each entitled to a pension of £100 a year. If they reside in England they draw their full £100 a year. If, however, they reside in India it is paid to them in rupees, which work out, at the present rate of exchange, at the value of £45 a year. The loss is so great as to be almost ruinous.

THE WINDSOR FOLDING BED

Today the great six day sale of high bred trotting horses opens at Chicago. This is the world renowned Tattersalls limited breeders sale, when animals bringing sums in five figures will be offered for the competition of eager buyers. Only high class stock will be offered, inasmuch as the entries have been subjected to a course of standard bred and developed speed.

Our annual clearance sale begins on Monday, March 6, and will continue for two weeks. We call attention to our discounts. This is our eighth annual sale, and we propose to have it surpass all others.

DISCOUNTS.
Screens, 25 per cent; baskets, 25 per cent; porcelain, 25 per cent; lacquer trays, 25 per cent; toys, 25 per cent; California curios, 20 per cent; leather goods, 20 per cent; rattan furniture, 20 per cent; stationery, 20 per cent; heavy rugs, 15 per cent; silks and crapes, 10 per cent. Extra discounts offered on large pieces.

KAN-KOO, 110 S. Spring-st. Opposite Nadeau.

Folding Bed Made.

Windsor Folding Beds.

The Windsor occupies one-sixth less space than any other folding bed, and can be moved from one room to another without extra exertion. When closed it is an ornament to any room, as it has the appearance of a wardrobe. It is easy to open and close, is perfectly noiseless, well ventilated, has ample room for all necessary bedding, which is not disturbed when closed, has no complicated machinery or springs to get out of order, and, in fact, is so perfect as to have no rival. We have them at all prices. Call and see whether you wish to buy or not.

Los Angeles Furniture Co.,

DR. HONG SOI.

317 S. Broadway, Los Angeles, Cal.

DR. HONG SOI has graduated and received his diploma from the medical schools and Universities in Canton, and made his first professional practice for many years in the hospitals of Canton and Hong Kong, China. He is the sixth of a generation of doctors in his family, and has made a thorough study of all diseases of the human body. The doctor has had wide experience as a physician, and during his long practice he has not been known to fail in a single case. He has treated many cases of CONSUMPTION, RHEUMATISM, ASTHMA, GOUT, GRAVEL, SICK HEADACHE, INDIGESTION, WAKEFULNESS AND NERVOUS TROUBLES, AND ALL DISEASES that the human body is heir to, by natural herb medicines, freshly prepared every day. No opium or poisonous drugs are used.

For two months I suffered with pain in the bladder. Three doctors treated me, each one giving a different cause for the trouble, but doing me no good. Then Dr. Hong Soi's medicines for two weeks and was entirely relieved of all pain.

Clark's Cutaway

Harrow!

The Reversible Harrow is Designed for Orchard Work.

The A-6 Reversible, when used with extension head, measures nine feet wide (see cut), and cultivates well under the trees, throwing dirt either to or from as desired. While the width is increased the draft is not, because the gangs are merely separated. It will pulverize the soil to the depth required and destroy all weeds and trash, thoroughly mixing them with the soil, thereby protecting the roots and retain the moisture. We heartily recommend it to all fruit growers as being the most serviceable tool in the market. For price lists and circulars address

PERCY W. TREAT,

Davisville Nurseries, Davisville, Cal.

Shoes

We commence with this department because we wish to push it to the front. Never be backward in coming forward with good things. We advertise solely to call your attention to meritorious merchandise. We carry only shoes of reputable manufacturers who are willing to guarantee the wear of their goods to us, and we in turn to our patrons. We aim to sell the best we can get at the closest margin of profit. To beget your confidence and trust, and to realize that when you buy an article from us it is just as represented, or the money awaits your pleasure.

The line of ladies' shoes that we sell at \$2.50 we have carried for several years. They are slightly, good fitters, and give excellent wear. For a shoe at this price you cannot do as well. We have seen samples at 25c a pair more in cost from other manufacturers that were not their equal. At \$3.50 and \$5 we have lines of ladies' shoes that we can commend to you as being the best value purchasable. Our line of ladies' Oxfords start in at \$1.50, and at the price is as good a value for that class of shoe as is our \$3.50 for its price.

In men's shoes the well-known lines of Hanan & Sons and Lilly, Brackett & Co. need no praise from us. In telling you that we are selling their \$8 shoe for \$5, we simply state that we have more on hand than our trade demands, and we are closing them for the present at that price. We give you a men's calf shoe, guaranteed to be calf, at \$2, and rise at intermediate prices to \$3. We are soliciting your patronage for this department on the basis of giving you the best shoe leather for the money, and upon no other.

Dress Goods.

The class of goods shown in dress fabrics and silks by us this season evidences the progress this department has made. A year and a half ago we did not profess to be a dress goods house; today we claim to be one of the leaders. The public have been generous enough in the past to accept our word as truth. We have never found it necessary to resort to affidavit making to strengthen our premises.

Every express brings us the highest creations of the dress fabric art, and our magnetic prices do the rest.

All dress goods under 50c a yard will be found at our domestic counter, adjoining the glove department; the right hand side entering the main store. At 50c a yard we are showing some novelties in all-wool dress goods; a line of summer weight broadcloths, 44 in. wide, at 50c, which we think are worth \$1; some gray, brown and mixed colors and handsome fabrics at 50c a yard. We think that you will find them the best value at the price in this or any other town. At 75c we are showing a number of lines of novelty dress goods including new crinkled weaves, block cloths, etc. They range in width from 40 to 46 inches, and we can assure you that they are sterling value at from \$1 to \$1.25 a yard. At \$1 per yard we have handsome novelties in velours, cord effects, dots and fancy designs, which for the money, we believe, will convince you that we are a dress goods house.

Silks.

Printed Indias.....50c
Cheney Bros' Silks.....75c
81-inch printed India Silks.....75c
Wash Silks for waists, blouses, etc.....75c
Exquisite quality and designs in India Silks.....85c
Novelty Silks from.....\$1.25 to \$3 a yard

The increasing patronage at this department shows increasing stock. We think that we can safely say that our silk department is 'strictly in it' this season; the designs are exquisite, the quality is better than we ever saw sold for the money, and this is in the face of a tremendous advance in raw silk. Our stock of plain silks is very large and complete; our business is increasing, not in our advertisements, but through patronage in our store. We simply ask you to look at our offerings in silks; if you disagree with us as to their value, we shall be greatly deceived.

Men's Wear.

We are the largest concern as evidenced by our frontage on Spring street. We have been a success from the moment we started in business. Our merchandise had merit, and our prices did the rest. We sell everything that man wears, save men's clothing. Our prices for quality are lower than any furniture, hatter or shoer in this town. If we were not people would not bring us their hard-earned cash and buy their goods on credit elsewhere. We want you to fall in line with those who are now coming to us and give us a trial. If you don't find it as we tell you, you are under no obligations to call again.

In men's hats we are selling two styles called the "Derby" and "Brighton"; they come in black and colors, in shapes and dimensions that please both the taste and judgment; the price is \$3. If you want a knock-about hat in French felt at 90c, you know where you can get it.

In men's Neckwear our 50c line is the best value we have ever shown. The manufacturer tells us that these goods cost him from \$6 to \$10.

In men's Overalls we manufacture a line of "wear guaranteed" garments; if they rip with ordinary usage we will take them back. We sell only the best of merchandise, and stand back of anything we sell. In men's Underwear we are selling a line of natural gray, full-fashioned shirts or drawers at \$1. These goods cost \$1.75 to manufacture. At 50c and 75c we are selling lines that are exceptional value for the prices.

Domestics.

Bourette Scotch ginghams, 37½c; Mullhouse Sateens, 25c; broad-clothed sateens, 30c; fine Scotch ginghams, 30c; printed cotton dress goods plain or flannel back, 15c; flannelettes, 8½c, 10c, 12½c and 15c; half-wool dress goods, new styles, 25c; half-wool challies, 19c; towels, 25c, 35c and 50c; table linen, 75c, 81 and \$1.25.

It is our intention merely to call to your notice among other great values found on our counters those that are encircled above. The Scotch gingham at 37½c is a bourette pattern; they are fast colors and the finest manufactured.

The Mullhouse sateen and the broad-clothed sateen, at the price, you will find more than reasonable; they are the very best of materials, and the styles the very newest. Came in yesterday.

The printed cotton dress goods you will find in most exquisite and elaborate printings as handsomely as they possibly could be, and great values for the prices asked.

The Scotch ginghams at 30c we have never in our lives seen a cloth so fine and a printing so delicate at the price.

It is by our prices that we maintain the supremacy of trade.

Ladies' Wear.

We are still hammering at Corsets. If you want anything good and reasonable in price go to the "PEOPLE'S STORE." That is what we are aiming at. Her Majesty's Corset is said to be the best of its kind manufactured. They range in price from \$2.75 to \$5. We have a line of French Corsets that we are selling at \$3.25. In popular priced Corsets at 50c, 75c, \$1, \$1.25 and \$1.50, you will find all the latest makes of good-selling Corsets represented in our stock. Some Corset manufacturers require a certain price to be maintained, but invariably if there is any benefit to be given the public, rest assured you will get it from us.

In Ladies' Underwear we are selling a high neck, long sleeve Balbriggan Vest at 50c. We think you will find it most reasonable. We shall place on sale a lot of Muslin Underwear and Children's White Dresses which will be to your interest to see before making purchases elsewhere.

At \$4.50 we are selling a tan Melton Cloth 3-piece Cape Military Jacket. At \$6 we are selling black Cordscrew, satin-lined Jackets, both of which we think very good value.

Millinery.

We have opened 50 cases of new Millinery,
